

The Case for Ending “Animal Science” Documented

Responsible Policies for Animals
www.RPAforAll.org

“Animal science” – training, propaganda, research, sales, and public relations for the meat, dairy, fish, and egg industries at our land-grant universities’ colleges of agriculture – is devastating to human health and wellbeing, nonhuman animals, and Earth’s ecosystems, and contrary to basic principles of education. Rooted in beliefs debunked by many fields of study, “animal science” is the most insidious instance of academic conflict of interest. The sources listed after the assertions in this document represent a vast body of work showing how anachronistic and destructive “animal science” is and why our universities must eliminate it.

Inclusion in this document does not mean a source or its author(s) promotes an end to “animal science” or endorses any assertion, claim, argument, activity, objective, or goal of Responsible Policies for Animals.

Format. Each section of *The Case Against “Animal Science” Documented* consists of a statement contributing to the argument that “animal science” should be eliminated, followed by sources, listed in alphabetical order by author, that provide knowledge, information, and analysis supporting the anti-“animal science” statement. Many of the listed sources support more than one of the anti-“animal science” statements.

► **“Animal science” and other academic conflict of interest corrupt universities, deceive and mislead students, and put private profits and careerism above human and ecological health and wellbeing, human morality, and the pursuit of knowledge.**

► **The laws establishing our colleges of agriculture at our land-grant universities and the U.S. Department of Agriculture refer to crops, soil, water, and seeds, never meat, dairy, fish, eggs, veterinary medicine, or any other industry or endeavor involving nonhuman animals. ("Agriculture" means cultivation of fields; there is no such thing as "animal agriculture" or an "agricultural animal.")**

An Act Donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts (known as "the Morrill Act" for its primary author in Congress). Congress of the United States of America, Washington, D.C. Approved July 2, 1862.

An Act to establish a Department of Agriculture. Congress of the United States of America, Washington, D.C. Approved May 15, 1862.

► **The National Research Council of the National Academies acknowledges change is needed at our colleges of agriculture, but fails to specify that the most-needed change is an end to "animal science," due to bias, careerism, and conflict of interest on the research committees and exclusion of disinterested authorities and informed advocates.**
